Birding along the Cape Whale Coast

Our endemic bird species

Water & shorebirds

BirdLife Overberg

Members of BirdLife Overberg, as well as the local birding groups, have provided the text and images for this Cape Whale Coast birding map. BirdLife Overberg was formed with the following aims in mind:

• To make the Overberg as a birding destination, thus contributing to the region's already impressive tourism infrastructure.

• To allow people in the Overberg with an interest in birds to contribute to the region's already impressive tourism infrastructure.

• To place strong emphasis on educational programs in order to get participants involved in the meaningful conservation of birds and their habitats.

Further information on birding along the Cape Whale Coast and the activities of BirdLife Overberg can be obtained from:

www.westerncapebirding.co.za

and go to 'NEWS' and then 'TRIP REPORTS'

There's a place just over one hour's drive from Cape Town, where you can almost touch whales from a cliff top; see more plants than anywhere else in south-western penguins sip their young, have conversations with sharks, hike peacefully.

A place where nature talks, - come, listen and experience.

www.capewhale.info
The Klein Seewoerdegte area and Swartkop is a well-known spot for birding in the area. Here, you can expect to see a variety of birds, including Cape Honey Buzzard, Black Stork, and White-faced Whistling-Duck. The area is also known for its diverse flora, with species such as the Milkwood, Gwarri, and Wild Fig.

The Rietvlei Nature Reserve is another popular birding spot, with over 300 species of birds recorded in the area. Visitors can expect to see species such as the African Penguin, Cape Cormorant, and the Cape Gannet. The reserve is home to a variety of birds, including waders, waders, and waterfowl, and is particularly good for birding in the winter months.
